**MOBILE HOUSING AUTHORITY
MOBILE, ALABAMA**

In response to the issuance of **RFP No MHA-06-R-2023, Pest Control Services.** Mobile Housing Authority ("MHA"), hereby responds to questions regarding the RFP as indicated below:

A. Responses to Questions Received.

1. Can a company who is awarded a bid do a large complex on a 4 time per month basis to be able to treat all units in the complex? This would be opposed to trying to do the entire complex in a day's time but allow for more time on site as a whole.

MHA Response: For a large complex multiple days in a row are acceptable.

2. Are the climb up bed bug detectors a necessity for the bed bug treatment?

MHA Response: Yes

3. We do preventative as well as reactionary treatments for termites. Our "spot" treatments for active termites are based on a 30 square foot area and not a linear footage. Can I just add that information to proposal packet?

MHA Response: Yes

4. What is the current contract award amount?

MHA Response: Knox Pest Control \$456,872.71
